

Preserve your Precious Greek Olive Oil with our Stainless Steel Olive Oil Containers

Some of the world's best olive oil comes from Greece. Over 80% of the olive oil produced in Greece is cold-pressed extra virgin olive oil. This results in an olive oil with a very low acidity, high level of polyphenols, and a distinct flavor and aroma. In order to extend its shelf life and preserve its quality and antioxidant properties, it is important to store it in the proper containers. Our special stainless steel containers prevent it from being degraded by sunlight and oxygen.
